

Communist Workers' Party of Australia

Statement

May 1, 2016

Our world stands on the brink. Human progress in technology, science, and industry offers us a future free from want and exploitation. But everywhere a small class takes while the remainder goes without.

This capitalist state of affairs has been reformed many times. As long as the few own and control industries real progress is blocked. Humanity cannot continue to allow a tiny minority to control our energies and our lives.

Capitalist democracy prevents the dismantling of improper and unjust regimes of property ownership. Only when the people rise shall the system be closed down. Only then will socialism be genuinely present in Australia.

The mission of the Communist Workers' Party of Australia is to assist and lead the working class and its allies. When the masses decide to rise up, our purpose is to spearhead that struggle.

The working class and its allies must control the state and the organs of the state. Capitalism must die.
